Intermittent Fasting for Beginners. An acclaimed classic from the award-winning author of *The Body Project* presents a history of women's food-refusal dating back as far as the sixteenth century, providing compassion to victims and their families. Here is a tableau of female self-denial: medieval martyrs who used starvation to demonstrate religious devotion, "wonders of science" whose families capitalized on their ability to survive on flower petals and air, silent screen stars whose strict "slimming" regimens inspired a generation. Here, too, is a fascinating look at how the cultural ramifications of the Industrial Revolution produced a disorder that continues to render privileged young women helpless. Incisive, compassionate, illuminating, *Fasting Girls* offers real understanding to victims and their families, clinicians, and all women who are interested in the origins and future of this complex, modern and characteristically female disease. The final chapter in this section explores the uses of food

in the classroom. The single most influential culinary trend of our time is fast food. It has spawned an industry that has changed eating, the most fundamental of human activities. From the first flipping of burgers in tiny shacks in the western United States to the forging of neon signs that spell out "Pizza Hut" in Cyrillic or Arabic scripts, the fast food industry has exploded into dominance, becoming one of the leading examples of global corporate success. And with this success it has become one of the largest targets of political criticism, blamed for widespread obesity, cultural erasure, oppressive labor practices, and environmental destruction on massive scales. In this book, expert culinary historian Andrew F. Smith explores why the fast food industry has been so successful and examines the myriad ethical lines it has crossed to become so. As he shows, fast food—plain and simple—devised a perfect retail model, one that works everywhere, providing highly flavored calories with speed, economy, and convenience.

But there is no such thing as a free lunch, they say, and the costs with fast food have been enormous: an assault on proper nutrition, a minimum-wage labor standard, and a powerful pressure on farmers and ranchers to deploy some of the worst agricultural practices in history. As Smith shows, we have long known about these problems, and the fast food industry for nearly all of its existence has been beset with scathing exposés, boycotts, protests, and government interventions, which it has sometimes met with real changes but more often with token gestures, blame-passing, and an unrelenting gauntlet of lawyers and lobbyists. Fast Food ultimately looks at food as a business, an examination of the industry's options and those of consumers, and a serious inquiry into what society can do to ameliorate the problems this cheap and tasty product has created. Whizz, gooey, pink champagne, base: the recreational and pharmacological use of 'Speed', from Amphetamine Sulphate to Crystal Meth is a

cultural habit which has existed since the early 1900s. Although considered a cheap and somewhat filthy habit, amphetamines have tempted an array of celebrities, including Elvis Presley, Truman Capote, The Beatles, Jack Kerouac, Johnny Cash, JFK and Adolf Hitler: All were at some point - to be blunt - speedfreaks. Speed-Speed-Speedfreak traces the cultural and criminal use of amphetamine and its unholy growth. Research on social movements has historically focused on the traditional weapons of the working class, especially labour strikes and street demonstrations-but everyday actions, such as eating or singing, which can also be turned into a means of protest, have yet to be fully explored. An interdisciplinary and comparative history of these modes of action, Bodies in Protest reveals how hunger strikes and music ranging from gospel songs to rock anthems can efficiently convey political messages and mobilize the masses. Common to both approaches, the contributions show, is a

direct appeal to the emotions and a reliance on the physical, concrete language of the human body. Intimate access to the mind of Francis Fukuyama and his reflections on world politics, his life and career, and the evolution of his thought From humble beginnings at Fairlie, Ayrshire, in the early years of the nineteenth century, William Fife and Son grew to become one of Britain's premier yacht-building yards, attracting commissions from as far afield as America, Canada and America. By the time the yard closed on the eve of the Second World War, three generations of the Fife family had been responsible for the design and building of almost a thousand yachts - crafts that were recognized world-wide as the epitome of elegance and design. This memorable story of enterprise and craftsmanship chronicles the development and progress of the Fife yard and its business during its 125-year history. It includes a vast wealth of information on the yachts themselves, and is interspersed with lively anecdotes about the

family, their clients and their craftsmen, making it an essential addition to the literature on Scotland's maritime past. May Fife McCallum, a descendant of the founder, has had privileged access to private papers, business records and photographs. Over many years she has researched this archival material and also recorded the reminiscences of family friends and of local people personally associated with the yard and its workforce. Excerpt from *Forty Days Without Food!: A Biography of Henry S. Tanner, M.D., Including a Complete and Accurate History of His Wonderful Fasts, Viz. 42 Days in Minneapolis, Minn., And 40 Days in New York City, With Valuable Deductions* This man came to New York City an entire stranger, and when he commenced his self-imposed task no one could be found willing to believe that he could accomplish it. He had not, however, gone many days before all who had closely observed him were thoroughly convinced that he was honestly endeavoring to perform his task. By his quiet,

unassuming manner, and the manifestation of his indomitable will in his trying ordeal, he has won for himself a host of friends; and it is but natural that all are anxious to know more of his life and character. About the Publisher

A global history of restaurants beyond white tablecloths and maître d's, *Dining Out* presents restaurants both as businesses and as venues for a range of human

experiences. From banquets in twelfth-century China to the medicinal roots of French restaurants, the origins of restaurants are not singular—nor is the history this book tells. Katie Rawson and Elliott Shore highlight stories across time and place, including how chifa restaurants emerged from the migration of Chinese workers and their marriage to Peruvian businesswomen in nineteenth-century Peru; how Alexander Soyer transformed kitchen chemistry by popularizing the gas stove, pre-dating the pyrotechnics of molecular gastronomy by a century; and how Harvey Girls dispelled the ill repute of waiting tables, making rich lives for themselves across the American West. From restaurant architecture to technological developments, staffing and organization, tipping and waiting table, ethnic cuisines, and slow and fast foods, this delectably illustrated and profoundly informed and entertaining history takes us from the world's first restaurants in Kaifeng, China, to the latest high-end dining

experiences. The origin of the Leslies is closely associated with the rise of the royal house of Canmore which ruled Scotland from 1057-1290. When members of the Scottish royalty returned from exile in Hungary in 1058, they were accompanied by a young Hungarian nobleman named Bartholomew. In 1070 he married Malcolm III's sister, Beatrix and founded the Clan Leslie which was named after a castle in Garioch in Aberdeenshire. Descendants of Bartholomew include the Earls of Rothes, Levan, Melville and Lords of Lesley, Lindores and Newark. Descendants live throughout the British Isles and Ireland and in other parts of the world. Wenn Sie diese Zusammenfassung lesen, werden Sie sich mit den wichtigsten wissenschaftlichen Fragen zum Leben und zum Universum auseinandersetzen. Es wird dir helfen zu verstehen, woher du kommst und auf welchem Planeten du lebst. Du wirst auch entdecken, dass : Die Erde ist nur ein winziger Teil des Universums. Es gibt viele Gefahren, die uns bedrohen, sowohl unter der Erde als auch in unserem Sonnensystem. Unsere Vorfahren, die Homo Sapiens-Hominiden, haben nicht alle ihre Geheimnisse preisgegeben. Die Welt des unendlich Kleinen ist ebenso wichtig wie die Welt des unendlich Großen. Zunächst einmal

muss man wissen, dass wir unsere Existenz nur einer gefährlichen Ansammlung von Atomen verdanken. Unser Leben besteht aus diesen außergewöhnlichen atomaren Gemischen. Dieser Gedanke führt uns zu der ersten Feststellung: Unser Leben hängt am seidenen Faden, genau wie unser Überleben. In der Tat ist die Langlebigkeit der menschlichen Spezies so ungewiss wie diese Ansammlungen von Atomen. How Judaism and food are intertwined Judaism is a religion that is enthusiastic about food. Jewish holidays are inevitably celebrated through eating particular foods, or around fasting and then eating particular foods. Through fasting, feasting, dining, and noshing, food infuses the rich traditions of Judaism into daily life. What do the complicated laws of kosher food mean to Jews? How does food in Jewish bellies shape the hearts and minds of Jews? What does the Jewish relationship with food teach us about Christianity, Islam, and religion itself? Can food shape the future of

Judaism? Feasting and Fasting explores questions like these to offer an expansive look at how Judaism and food have been intertwined, both historically and today. It also grapples with the charged ethical debates about how food choices reflect competing Jewish values about community, animals, the natural world and the very meaning of being human. Encompassing historical, ethnographic, and theoretical viewpoints, and including contributions dedicated to the religious dimensions of foods including garlic, Crisco, peanut oil, and wine, the volume advances the state of both Jewish studies and religious studies scholarship on food. Bookended with a foreword by the Jewish historian Hasia Diner and an epilogue by the novelist and food activist Jonathan Safran Foer, Feasting and Fasting provides a resource for anyone who hungers to understand how food and religion intersect. Die Herausforderung religionsgeschichtlicher Forschung besteht darin, die Erschließung von Quellen in ihren

Kontexten und ihre theoriegeleitete Erklärung mit einer historisch-kritischen Reflexion der Wissensproduktion selbst zu verknüpfen. Die Reihe Religionsgeschichtliche Versuche und Vorarbeiten (RGVV) will dieser Komplementarität von historischer Kontextualisierung, theoretischer Verdichtung und disziplinärer Positionierung Rechnung tragen. Studien zu kulturspezifischen Sachzusammenhängen stehen neben vergleichenden Arbeiten, in Form von Monographien oder thematisch fokussierten Sammelbänden. This book seeks to explore the divine institution of fasting in Islam by providing comprehensive information on its place in the Islamic doctrine and on the month of Ramadan in which fasting is observed. Major topics include fasting in Islam and other faiths; merits and benefits of fasting; types of fasts; charity in ramadan; fasting and health. Fasting in Islam is a well-written introduction book that lays down the basics of fasting as practiced by Muslims. A

journalist delves into the history, science, and practice of fasting, an ancient cure enjoying a dynamic resurgence. When should we eat, and when shouldn't we? The answers to these simple questions are not what you might expect. As Steve Hendricks shows in *The Oldest Cure in the World*, stop eating long enough, and you'll set in motion cellular repairs that can slow aging and prevent and reverse diseases like diabetes and hypertension. Fasting has improved the lives of people with epilepsy, asthma, and arthritis, and has even protected patients from the worst of chemotherapy's side effects. But for such an elegant and effective treatment, fasting has had a surprisingly long and fraught history. From the earliest days of humanity and the Greek fathers of medicine through Christianity's "fasting saints" and a nineteenth-century doctor whose stupendous forty-day fast on a New York City stage inaugurated the modern era of therapeutic fasting, Hendricks takes readers on a rich and comprehensive tour. Threaded throughout are

Hendricks's own adventures in fasting, including a stay at a luxurious fasting clinic in Germany and in a more spartan one closer to home in Northern California. This is a playful, insightful, and persuasive exploration of our bodies and when we should—and should not—feed them. Christians have altered the course of history and governments by emphasizing biblical methods of prayer and fasting. Learn how you, too, can implement change in your family, church, city, country, and the world through these two powerful weapons -- prayer and fasting. From obscure Pre-Columbian beginnings in the Andes Mountains to global popularity today, the story of the potato is one of rags to riches. In *Potato*, esteemed culinary historian Andrew F. Smith reveals the captivating story of a once lowly vegetable that has changed—and continues to change—the world. First domesticated by prehistoric people in the Andes, the potato has since been adopted by cultures around the globe. For instance, the potato was aggressively

adopted by cooks in India and China, where it has become a dietary staple. In fact, these two countries now stand as the world's largest potato producers. Nonetheless, despite its popularity, in this era of both fast food and health consciousness, the potato is now suffering negative publicity regarding its low nutritional value. Its health benefits continue to be debated, especially considering that the potato is most often associated with the ubiquitous but high-calorie french fry. Potato is a captivating read that provides a concisely written but thoroughly researched account of the history, economy, politics, and gastronomy behind this beloved starch—as well as recipes. As loaded with goodies as a well-dressed baked potato, this book is comforting and satisfying. Jason Fung has used a variety of fasting protocols with more than 1,000 patients, with fantastic success.
