Recent books have drawn attention to an unfinished gender revolution and the reversal of gender progress. However, this literature primarily focuses on gender inequality in the family and its effect on women's career and family choices. While an important topic, these works? ?are critiqued for being particularly attentive to the concerns of middle-class, heterosexual, White women and ignoring or erasing the issues and experiences of the vast majority of women throughout the United States (and other countries). ? *Women and Inequality in the 21st Century* is an edited collection that addresses this dearth in the current literature. This book examines the continued inequities navigated by women occupying marginalized social positions within a "nexus of power relations." It addresses the experiences of immigrant women of color, aging women, normative gender constraints faced by lesbian and gender non-conforming individuals assigned the female gender at

birth, religious constraints on women's sexual expression, and religious and ethnic barriers impeding access to equality for women across the globe. Contributors to this collection reflect varying fields of inquiry--including sociology, psychology, theology, history, and anthropology. Their works employ empirical research methods, hermeneutic analysis, and narrative to capture the unique gender experiences and negotiations of diverse 21<sup>st</sup>-century women.

Editors Jean-Michel Ganteau and Susana Onega) have assembled a volume which addresses the relationship between trauma and ethics, and moves one step further to engage with vulnerability studies in their relation to literature and literary form. It consists of an introduction and of twelve articles written by specialists from various European countries and includes an interview with US novelist Jayne Anne Philips, conducted by her translator into French, Marc Amfreville, addressing her latest novel, *Quiet Dell*, through the victimhood-vulnerability prism. The corpus of primary sources on which the volume is based draws on various literary backgrounds in English, from Britain to India, through the USA. The editors draw on material from the ethics of alterity, trauma studies and the ethics of vulnerability in line with the work of moral philosophers like Emmanuel Levinas, as well as with a more recent and challenging tradition of continental thinkers, virtually unknown so far in the English-speaking world, represented by Guillaume Le Blanc, Nathalie

Maillard, and Corinne Pelluchon, among others. Yet another related line of thought followed in the volume is that represented by feminist critics like Catriona McKenzie, Wendy Rogers and Susan Dodds. The new edition of this comprehensive and accessible introduction to the field continues to provide an engaging and coherent foundation to the subject. It considers traditional and alternative approaches to IPE, and in doing so elucidates key concepts, assumptions and the intellectual and historical context in which they arose and developed. It includes key coverage of the post-2015 financial crisis and the international government responses to recent challenges as well as new learning material. At all times, it makes clear their relevance to issues from trade finance and government, to environment, technology, health, migration, labour, development and culture. **\*\*THE NUMBER ONE BESTSELLER\*\*** In twenty-one bite-sized lessons, Yuval Noah Harari explores what it means to be human in an age of bewilderment. '21 Lessons is, simply put, a crucial book' Adam Kay How can we protect ourselves from nuclear war, ecological cataclysms and technological disruptions? What can we do about the epidemic of fake news or the threat of terrorism? What should we teach our children? Yuval Noah Harari takes us on a thrilling journey through today's most urgent issues. The golden thread running through his exhilarating new book is the challenge of maintaining our collective and individual focus in the face of constant and disorienting change. Are we still capable of understanding the world we have created? 'Fascinating... compelling... [Harari] has teed up

a crucial global conversation about how to take on the problems of the 21st century' Bill Gates, New York Times 'Truly mind-expanding... Ultra-topical' Guardian Historically, European churches have played a large part in the provision of welfare. Responsibility, however, has gradually shifted to the state - a shift that forms an integral part of the process of secularization and one that has been readily accepted by European populations. But what happens when the state itself begins to recede - a process that is occurring in most, if not all, European societies for a wide variety of reasons? The implications for welfare are considerable, not least for the role of the churches which begin to resume the responsibilities previously shed but in new and different ways. This book looks at the connections between religion and welfare in Europe, exploring in detail eight European societies - Finland, Norway, Sweden, England, Germany, France, Italy and Greece. The different theological traditions, different church-state relationships and different welfare regimes are all examined. The analysis is based on first hand empirical research which considers not only the changing situation on the ground, but attitudes towards this within a range of different constituencies - the churches, local government and the general public. Particular attention is paid to the significance of gender in both the process of change and in attitudes towards this. Welfare and Religion in 21st Century Europe: Volume 1 represents comparative research at its best and highlights key policy implications for the future. A companion book, Welfare and Religion in 21st Century Europe: Volume 2 explores

thematically the changing nature of religion and welfare and the new relationships that are emerging between the religious and the secular, and between church and state in the 21st century. *The Role of Terrorism in 21st-Century Warfare* looks critically at the major armed conflicts that occurred during the 1990s and first decade of the present century. Conflicts in Bosnia, Kosovo, Chechnya, Iraq, Afghanistan, and Syria all involved the use of terrorism by one or more of the contestants, and at one time or another. What does this fact mean for violent conflicts yet to come? Authors Weinberg and Martin apply a comprehensive and systematic analysis to a variety of case studies examining the role played by terrorism as a stand-alone tactic as well as one used to ignite broad-scale conflict. Does terrorist violence occur during the early stages of an insurgency, as a leading indicator of a wider conflict? Or, is terrorism employed throughout the conflict's duration? On what occasions does terrorism tend to occur as an armed conflict begins to subside? When, in other words, is it a trailing indicator? This book represents the results of Weinberg and Martin's thorough investigation into the timing and role of terrorist violence in multi-dimensional conflicts. It is an essential text for understanding the role acts of terror play in warfare today and into the future. Virtual learning environments represent an entirely new form of educational technology. Focuses on the changing context of education; the changing nature of self-managing

schools; their own leadership and management skills within this environment. Bilingual Education in the 21st Century examines languages and bilingualism as individual and societal phenomena, presents program types, variables, and policies in bilingual education, and concludes by looking at practices, especially pedagogies and assessments. This thought-provoking work is an ideal textbook for future teachers as well as providing a fresh view of the subject for school administrators and policy makers. Provides an overview of bilingual education theories and practices throughout the world Extends traditional conceptions of bilingualism and bilingual education to include global and local concerns in the 21st century Questions assumptions regarding language, bilingualism and bilingual education, and proposes a new theoretical framework and alternative views of teaching and assessment practices Reviews international bilingual education policies, with separate chapters dedicated to US and EU language policy in education Gives reasons why bilingual education is good for all children throughout the world, and presents cases of how this is being carried out This book explores the emerging challenges to foreign policymaking in liberal democracies and the adequacy of the 'marketplace of ideas' in responding to these challenges. Looking at foreign policy challenges as diverse as democratization, globalization and climate change, from the role of values in environmental debate to the Iraq invasion and the war on drugs, the contributors critically examine how key global issues are framed in public debate across three of the world's most mature liberal

democracies: the US, the UK, and Australia. The book contributes to a better understanding of the limits of the 'marketplace of ideas' in helping to produce wise and accountable policy, and how those limits may soon be overcome. Examining how key global issues are framed in foreign policy debate across a range of liberal democratic societies, this book will strongly appeal to academics and students with an interest in international relations, policymaking and politics, as well as to governmental and think tank policymakers and advisors. Students in the 21st century still need to develop traditional reading and writing skills, and they must also learn how to use technology for communicating and collaborating in new ways. This book offers specific teaching strategies for developing student literacy in using search engines efficiently, evaluating information found on websites, avoiding plagiarism, communicating with a wide audience, working collaboratively, and creating multimedia products. Increasing knowledge of the biological is fundamentally transforming what life itself means and where its boundaries lie. New developments in the biosciences - especially through the molecularisation of life - are (re)shaping healthcare and other aspects of our society. This cutting edge volume studies contemporary bio-objects, or the categories, materialities and processes that are central to the configuring of 'life' today, as they emerge, stabilize and circulate through society. Examining a variety of bio-objects in contexts beyond the laboratory, *Bio-Objects: Life in the 21st Century* explores new ways of thinking about how novel bio-objects enter contemporary life, analysing the manner in

which, among others, the boundaries between human and animal, organic and non-organic, and being 'alive' and the suspension of living, are questioned, destabilised and in some cases re-established. Thematically organised around questions of changing boundaries; the governance and regulation of bio-objects; and changing social, economic and political relations, this book presents rich new case studies from Europe that will be of interest to scholars of science and technology studies, social theory, sociology and law. "Just as no one was left unaffected by the rise of globalization, no one will be unaffected by its demise. The only response that reduces our vulnerability is self-reliance. When Ralph Waldo Emerson wrote his famous essay *Self-Reliance* in 1841, the economy was localized and households supplied many of their own essentials. In our hyper-globalized economy, we're dependent on distant sources for our essentials. Emerson defined self-reliance as being our best selves—thinking for ourselves rather than following the conventional path. Self-reliance in the 21st century means reducing our dependency on fragile supply chains and becoming producers as well as consumers. Self-reliance is often confused with self-supporting (making enough money to support yourself) and self-sufficiency—the equivalent of Thoreau's a cabin on Walden Pond. But self-reliance in the 21st century isn't about piling up money or a cabin in the woods; it's about humanity's most successful innovation: cooperating with trustworthy others in productive networks. This book explores the mindset of self-reliance and 18 principles that advance self-reliance in the 21st century."--Back

cover. An unexpected immigration wave of Jews from the former Soviet Union mostly in the 1990s has stabilized and enlarged Jewish life in Germany. Jewish kindergartens and schools were opened, and Jewish museums, theaters, and festivals are attracting a wide audience. No doubt: Jews will continue to live in Germany. At the same time, Jewish life has undergone an impressive transformation in the second half of the 20th century— from rejection to acceptance, but not without disillusionments and heated debates. And while the ‘new Jews of Germany,’ 90 percent of them of Eastern European background, are already considered an important factor of the contemporary Jewish diaspora, they still grapple with the shadow of the Holocaust, with internal cultural clashes and with difficulties in shaping a new collective identity. What does it mean to live a Jewish life in present-day Germany? How are Jewish thoughts, feelings, and practices reflected in contemporary arts, literature, and movies? What will remain of the former German Jewish cultural heritage? Who are the new Jewish elites, and how successful is the fight against anti-Semitism? This volume offers some answers. This book explores the various manifestations of affects in British theatre of the 21st century. The introduction gives a concise survey of existing and emerging theoretical and research trends and argues in favour of a capacious understanding of affects that mediates between more autonomous and more social approaches. The twelve chapters in the collection investigate major works in Britain by playwrights and theatre makers including Mojisola Adebayo, Mike Bartlett, Alice Birch, Caryl Churchill, Tim Crouch and Andy Smith, Rachel De-lahay, Reginald Edmund, James Fritz, David Greig, Idris Goodwin, Zinnie Harris, Kieran Hurley, Lucy Kirkwood, Anders Lustgarten, Yolanda Mercy, Anthony Neilson, Lucy Prebble, Sh!t Theatre, Penelope Skinner, Stef Smith, Kae Tempest and debbie tucker green. The interpretations identify significant areas of tension as they relate affects to the fields of cognition, politics and hope. In this, the chapters uncover interrelations of thought, intention and empathy; they reveal the nexus between identities, institutions and ideology; and, finally, they explore how theatre can accomplish the transition from a sense of crisis to utopian visions. This is a book about the news--the way it is written and the forms it takes. It examines the relation between the content of public information and the potential affect of new technologies on the degree and type of information available in the public forum. Tom Koch uses concrete, casebook examples to demonstrate the degree to which news information can be changed through the efficient and cost effective application of online bibliographic resources accessed by personal computers.

Koch argues that new, computer-based technologies will revolutionize news and public information by fundamentally altering the relation between writer and news subject. He shows how electronic databases, by making enormous amounts of data on virtually every subject available to the news writer or editor, have changed the equation which has defined news since at least the 1920s. To make clear the degree to which these systems will transform news, the author demonstrates how online resources can be used efficiently and inexpensively by generalists. Practical issues of online use are presented within the context of both the parameters of contemporary journalism and the means by which these technologies address its limits. Two separate chapters, one describing search technologies and the other reviewing database organization will be of practical value to both neophyte and journeyman news and public information writers alike. Using examples from his own and other's work, Koch demonstrates ways to carry out simple and inexpensive searches. His book will be especially important to the news or research librarian, reporter, and the public information or public relations writer. Twenty-two leading Latin American philosophers are featured in this complete anthology on the human condition, values, and the search for identity. Bibliography. Shift happens: Emerging technologies and globalization have resulted in political, social and cultural changes. These changes have a profound impact on all aspects of human life, including education. Yet while society has changed and continues to change, schools are slow to keep up. This book explores issues

related to transforming and modernizing our educational systems, including the impact of societal shifts on education, the efforts at various levels to bring schools into the 21st century, the identification of 21st century skills, the reformation of the curriculum, the creation of alternative models of schooling, the innovative use of technology in education, and many others. It addresses questions like the following: Should schools systems adapt to better meet the needs of tomorrow's world and how should this be accomplished? How can society better prepare students for a changing and challenging modern world? What skills do students need to lead successful lives and become productive citizens in the 21st century? How can educators create learning environments that are relevant and meaningful for digital natives? How can the school curriculum be made more rigorous to meet the needs of the 21st century? This book encourages readers to transcend the limits of their own educational experience, to think beyond familiar notions of schooling, instruction and curriculum, to consider how to best structure learning so that it will benefit future generations. It encourages a deeper analysis of the existing education system and offers practical insights into future directions focused on preparing students with 21st century skills. This book brings together a carefully selected range of contemporary disciplinary approaches to new areas of Gothic inquiry. Moving beyond the representational and historically based aspects of literature and film that have dominated Gothic studies, this volume both acknowledges the contemporary diversification of Gothic scholarship and

maps its changing and mutating incarnations. Drawing strength from their fascinating diversity, and points of correlation, the varied perspectives and subject areas cohere around a number of core themes — of re-evaluation, discovery, and convergence — to reveal emerging trends and new directions in Gothic scholarship. Visiting fascinating areas including the Gothic and digital realities, uncanny food experiences, representations of death and the public media, Gothic creatures and their popular legacies, new approaches to contemporary Gothic literature, and re-evaluations of the Gothic mode through regional narratives, essays reveal many patterns and intersecting approaches, forcefully testifying to the multifaceted, although lucidly coherent, nature of Gothic studies in the 21st Century. The multiple disciplines represented — from digital inquiry to food studies, from fine art to dramaturgy — engage with the Gothic in order to offer new definitions and methodological approaches to Gothic scholarship. The interdisciplinary, transnational focus of this volume provides exciting new insights into, and expanded and revitalised definitions of, the Gothic and its related fields. China is an economic giant and influential part of the current world order. What drives its leaders, and what values do they hold? David Burnett answers this question by showing how Chinese religious ideas and practices have developed and changed over the millennia. Only by understanding this broader picture can one come to understand the complex spiritual and religious situation of modern China. Accordingly he explores the influences of Buddhism, Confucianism and the Jesuits; he looks at the Ming

Dynasty and the rise of the Manchus; he assesses the motivations behind Mao, Deng Xiaoping and the current communist and commercial regime. Why is an atheistic leadership seeing a widespread religious revival, across several faiths? What is the future for the religions of China? This volume critiques contemporary power trends by examining key bilateral dynamics between five putative 'poles' of the multipolar order in the twenty-first century. Written by emerging scholars and established academics, this work provides a timely and authoritative analysis of one of the most controversial and compelling security debates of the twenty-first century. Adopting a detailed case study approach, the volume examines contemporary great power relations between the US, China, Russia, India and the EU. Each chapter explores the essential nature and characteristics of individual inter-state relationships in order to explicate and appraise the empirical evidence for a putative multipolar order. The volume aims to deepen understanding of power trends and critically assess the individual inter-dynamics at play. In doing so, it critiques the various models offered, such as the hub and spoke model (with the US remaining as the primary actor) and Zakaria's 'networked' model, as part of a purported 'post-American world'. The work places each of the individual relationships into a wider strategic and political context, in relation to the continued international turbulence and change that has seemed even more prominent in recent times, taking into account the twin challenges of Brexit and the presidency of Donald Trump. It concludes by returning the focus to the central questions of if, how and when a

post-American, multipolar world could develop. This volume will be of much interest to students of global security, foreign policy, and IR in general. "The vertical farm is a world-changing innovation whose time has come. Dickson Despommier's visionary book provides a blueprint for securing the world's food supply and at the same time solving one of the gravest environmental crises facing us today."--Sting Imagine a world where every town has their own local food source, grown in the safest way possible, where no drop of water or particle of light is wasted, and where a simple elevator ride can transport you to nature's grocery store - imagine the world of the vertical farm. When Columbia professor Dickson Despommier set out to solve America's food, water, and energy crises, he didn't just think big - he thought up. Despommier's stroke of genius, the vertical farm, has excited scientists, architects, and politicians around the globe. Now, in this groundbreaking book, Despommier explains how the vertical farm will have an incredible impact on changing the face of this planet for future generations. Despommier takes readers on an incredible journey inside the vertical farm, buildings filled with fruits and vegetables that will provide local food sources for entire cities. Vertical farms will allow us to: - Grow food 24 hours a day, 365 days a year - Protect crops from unpredictable and harmful weather - Re-use water collected from the indoor environment - Provide jobs for residents - Eliminate use of pesticides, fertilizers, or herbicides - Drastically reduce dependence on fossil fuels - Prevent crop loss due to shipping or storage - Stop agricultural runoff Vertical farms can be built in

abandoned buildings and on deserted lots, transforming our cities into urban landscapes which will provide fresh food grown and harvested just around the corner. Possibly the most important aspect of vertical farms is that they can be built by nations with little or no arable land, transforming nations which are currently unable to farm into top food producers. In the tradition of the bestselling *The World Without Us*, *The Vertical Farm* is a completely original landmark work destined to become an instant classic. Yuval Noah Harari ist der Weltstar unter den Historikern. In «Eine kurze Geschichte der Menschheit» erzählte er vom Aufstieg des Homo Sapiens zum Herrn der Welt. In «Homo Deus» ging es um die Zukunft unserer Spezies. Sein neues Buch schaut auf das Hier und Jetzt und konfrontiert uns mit den drängenden Fragen unserer Zeit. Wie unterscheiden wir Wahrheit und Fiktion im Zeitalter der Fake News? Was sollen wir unseren Kindern beibringen? Wie können wir in unserer unübersichtlichen Welt moralisch handeln? Wie bewahren wir Freiheit und Gleichheit im 21. Jahrhundert? Seit Jahrtausenden hat die Menschheit über den Fragen gebrütet, wer wir sind und was wir mit unserem Leben anfangen sollen. Doch jetzt setzen uns die heraufziehende ökologische Krise, die wachsende Bedrohung durch Massenvernichtungswaffen und der Aufstieg neuer disruptiver Technologien unter Zeitdruck. Bald schon wird irgendjemand darüber entscheiden müssen, wie wir die Macht nutzen, die künstliche Intelligenz und Biotechnologie bereit halten. Dieses Buch will möglichst viele Menschen dazu anregen, sich an den großen Debatten unserer Zeit zu

beteiligen, damit die Antworten nicht von den blinden Kräften des Marktes gegeben werden. "Small Business Management in the 21st Century offers a unique perspective and set of capabilities for instructors. The authors designed this book with a "less can be more" approach, and by treating small business management as a practical human activity rather than as an abstract theoretical concept. The text has a format and structure that will be familiar to you if you use other books on small business management. Yet it brings a fresh perspective by incorporating three distinctive and unique themes and an important new feature (Disaster Watch) which is embedded throughout the entire text. These themes assure that students see the material in an integrated context rather than a stream of separate and distinct topics."--Open Textbook Library. This text discusses the theories and practices of journalism in 21st India. The four main sections examine dealing with the media representation of marginalized groups of society, studying the coverage of important areas such as economics and science, different kinds of journalistic practice, and future trends of journalism. Management Challenges for the 21st Century looks afresh at the future of management thinking and practice. This astonishing new book from the world's leading management guru revolves around two fundamental issues that are occurring simultaneously: changes in the world economy, and shifts in the practice of management. These developments, especially in developed countries, are crucial in exploring and understanding the challenges of the future. Management Challenges for the 21st Century

focuses in on the key questions for all businesses: · What are the new realities? · What new policies are required of companies and executives in order to deal with these changes? Facing a whole swathe of issues head-on in his usual clear-sighted style, Drucker offers up a prescient and informed analysis that will help every executive to build a proactive strategy for the future. \*Written by one of the world's leading management gurus \*Deals with the pressing challenges facing all organizations in the 21st century \*Offers clear-sighted analysis and advice Reviews and critiques the major attempts at biblical ethics over the past twenty years by both biblical theologians and theological ethicists, focusing on New Testament ethics as an illustration. Through stories of diverse landscapes from around the world, this book captures human cultures and their land use practices in the environments they inhabit. The chapters cover topics from heritage in the 21st Century, appreciating and safeguarding values while facing challenges wrought by change. This title will lead readers through fascinating stories of landscapes and people. We learn of the physical and spiritual structure of rice terraces of the Honghe Mountains in China maintained by following a 1300 year sustainable practice of water allocation, while the colonial tea plantations of the Sri Lankan highlands are managed by Indian Tamils who now seek tourism as a means of additional income. Sustainable agricultural methods in the USA are being introduced to prevent landscape loss while in Australia a challenge confronting family farms is progressing to rural industrialisation. Challenges are further outlined in the mythical story

of Finland's Saint Henrik pilgrimage and in the intangible Ui-won gardens of Korea. The huge challenge for Japan's landscapes is the legacy from fierce natural 21st Century disasters while in Australia's Dampier Archipelago, an avoidable yet brutal development on a unique Aboriginal rock sculptured landscape highlights serious concerns about heritage governance. These remarkable stories of landscapes and their management are inseparable from the communities that inhabit them. This book was originally published as a special issue of Landscape Research. For decades, liberal democracy has been extolled as the best system of governance to have emerged out of the long experience of history. Today, such a confident assertion is far from self-evident. Democracy, in crisis across the West, must prove itself. In the West today, the authors argue, we no longer live in "industrial democracies," but "consumer democracies" in which the governing ethos has ended up drowning households and governments in debt and resulted in paralyzing partisanship. In contrast, the long-term focus of the decisive and unified leadership of China is boldly moving its nation into the future. But China also faces challenges arising from its meteoric rise. Its burgeoning middle class will increasingly demand more participation, accountability of government, curbing corruption and the rule of law. As the 21st Century unfolds, both of these core systems of the global order must contend with the same reality: a genuinely multi-polar world where no single power dominates and in which societies themselves are becoming increasingly diverse. The authors argue that a new system of

"intelligent governance" is required to meet these new challenges. To cope, the authors argue that both East and West can benefit by adapting each other's best practices. Examining this in relation to widely varying political and cultural contexts, the authors quip that while China must lighten up, the US must tighten up. This highly timely volume is both a conceptual and practical guide of impressive scope to the challenges of good governance as the world continues to undergo profound transformation in the coming decades. Vastu Shastra is not merely an art but a definite science in itself. This book has made an excellent effort to establish this fact. The book attempts to highlight the principles of Vastu science and its application in designing of the built environment to enhance the quality of life. This science is still relevant and effective in the modern life-changing styles of Architecture with the universal application of its principles. The author has tried to justify that Vastu principles are much in need in the 21st century in view of rapid advancements man is making in other fields without compensating on ecology front, which forms the basis of Vastu. In the end, an attempt has been made to give a compound solution to the problem of Vastu-based planning.

Immigration policy is one of the most contentious issues facing policy makers in the twenty-first century. Immigration in the Twenty-First Century provides students with an in-depth introduction to the politics that have led to the

development of different approaches over time to immigration policy in North America, Europe, and Australia. The authors draw on the work of the most respected researchers in the field of immigration politics as well as providing insights from their own research. The book begins by giving students an overview of the theoretical approaches used by political scientists and other social scientists to analyze immigration politics, as well as providing historical background to the policies that are affecting electoral politics. A comparative politics approach is used to develop the context that explains the ways that immigration has affected politics and how politics has affected immigration policy in migrant-receiving countries. Topics such as party politics, labor migration, and citizenship are examined to provide a broad basis for understanding policy changes over time. Immigration remains a contentious issue, not only in American politics, but around the globe. The authors describe the way that immigrants are integrated, their ability to become citizens, and their role in democratic politics. This broad-ranging yet concise book allows students to gain a better understanding of the complexities of immigration politics and the political forces defining policy today. Features of this Innovative Text Covers hot topics including party politics, labor migration, assimilation, and citizenship both in the United States as well as globally. It offers a new framework for making critical moral choices, as well as case studies that reinforce the concepts and principles rising to prominence in 21st century communication. The book addresses the unique problems facing journalism today, including how we arrive at truth in an era of abundant and unverified information; the evolution of new business models and partnerships; the presence of journalists on independent social media platforms; the role of diversity; the meaning of stories; the value of images; and the role of community in the production of journalism. *Book Banning in 21st Century America*, based on thirteen contemporary book challenge cases in schools and public libraries across the United States argues that understanding contemporary reading practices, especially interpretive strategies, is vital to understanding why people attempt to censor books in schools and public libraries.
