On 31 May 2000, flight AF447, an Airbus A330-200, took off from Rio de Janeiro bound for Paris. The Airbus A380 carrying 315 passengers and crew was out of control, with violent negative G forces propelling anyone and anything untethered through the cabin roof. It took the skill and discipline of veteran US Navy Top Gun Kevin Sullivan, captain of the ill-fated flight, to wrestle the plane back under control and perform a high-stakes emergency landing at a RAAF base on the WA coast 1200 kilometres north of Perth. In No Man's Land, the captain of the flight tells the full story for the first time. It's a gripping, blow-by-blow account of how, along with his co-pilots, Sullivan relied on his elite military training to land the gravely malfunctioning plane and narrowly avert what could have been a horrific air disaster. As automation becomes the way of the future, and in the aftermath of Ethiopian Airlines flight 302 and Lion Air flight JT610, the story of QF72 raises important questions about how much control we relinquish to computers and whether more checks and balances are needed.
