Manual of Neotropical Birds Aug 20 2022

Containing more than one-third of the world's bird species, the neotropical region surpasses all other zoogeographic regions in the diversity of its avian fauna. Though the exploration and cataloging stages of

ornithology are now virtually complete, new species and undescribed subspecies of birds are still occasionally discovered. In this manual, Emmet R. Blake has drawn on his experience of forty-eight years in the field and laboratory to prepare a comprehensive, detailed, and authoritative synopsis of the avifauna of tropical America as now known.

A Manual of Paper Chromatography and Paper Electrophoresis Dec 12 2021 A Manual of Paper Chromatography and Paper Electrophoresis provides a comprehensive discussion of the techniques of paper chromatography and paper electrophoresis. The book is organized into two parts. Part I on paper chromatography provides a readily accessible source for some of the many uses and adaptations of paper chromatography. An effort has been made to write a practical manual in which tried and proved procedures, employing relatively simple equipment and available reagents, are summarized. Part II on paper electrophoresis discusses basic principles and methodology. The emphasis throughout has been on the separation of protein mixtures, particularly blood serum. This reflects the fact that it is in this particular application that paper

electrophoresis has thus far not been challenged by paper chromatography, whereas many of the smaller molecules can be resolved equally well or better by the thus far more widely employed chromatographic procedures.
