Written by expert authors specializing in pharmacy practice and research, this valuable text will provide pharmacy students and practitioners with a thorough understanding of the principles and practices of drug literature evaluation with a strong grounding in research and biostatistical principles. Principles of Research Design and Drug Literature Evaluation is an ideal foundation for professional pharmacy students and a key resource for pharmacy residents, research fellows, practitioners, and clinical researchers. FEATURES * Chapter Pedagogy: Learning Objectives, Review Questions, References, and Online Resources * Instructor Resources: PowerPoint Presentations, Test Bank, and an Answer Key * Student Resources: a Navigate Companion Website, including Crossword Puzzles, Interactive Flash Cards, Interactive Glossary, Matching Questions, and Web Links From the Foreword: "This book was designed to provide and encourage practitioner's development and use of critical drug information evaluation skills through a deeper understanding of the foundational principles of study design and statistical methods. Because guidance on how a study's limited findings should not be used is rare, practitioners must understand and evaluate for themselves the veracity and implications of the inherently limited primary literature findings they use as sources of drug information to make evidence-based decisions together with their patients. The editors organized the book into three supporting sections to meet their pedagogical goals and address practitioners' needs in translating research into practice. Thanks to the editors, authors, and content of this book, you can now be more prepared than ever before for translating research into practice." L. Douglas Ried, PhD, FAPhA Editor-in-Chief Emeritus, Journal of the American Pharmacists Association Professor and Associate Dean for Academic Affairs, College of Pharmacy, University of Texas at Tyler, Tyler, Texas

Study of Man Feb 26 2023 14 lectures, Stuttgart, August - September 1919 (CW 293) Although these lectures were given to teachers as preparatory material, they are by no means concerned only with education. Study of Man is Steiner's most succinct presentation of his human-centered spiritual psychology, and it is accessible to anyone genuinely interested in the questions of human existence. His approach is unique because it considers not only the influences that affect humanity from the past, but also future states of consciousness and being. Reprinted here in the original "classic" translation by A.C. Harwood and Helen Fox, these lectures were given in 1919 to the teachers of the Waldorf school in Stuttgart--the first to be based on the educational ideas of Rudolf Steiner. After eighty-five years of Waldorf education--and exponential growth around the world--this volume remains the basic study text for teachers in Steiner schools. As well as providing a basis for the work of educators, Study of Man will be of special interest to parents, counselors, psychologists, and students of Rudolf Steiner's philosophy--for whom this volume provides a fundamental picture of the human being according to the anthroposophic understanding of the world. This book is a translation of Allgemeine Menschenkunde als Grundlage der Pädagogik (GA 293), published by Rudolf Steiner Nachlassverwaltung, Dornach.

Sociological Life Course Research Feb 14 2022 This introductory book provides an insight into sociological life course research and informs about its theoretical assumptions, analytical concepts and main results. Sociological life course research - like biographical research - has developed into an independent and fruitful field of research since the end of the 1960s. It is true that half a century earlier, in their famous study of "The Polish Peasant in Europe and America" (1918-20), Thomas and Znaniecki had already used life records to examine the connection between social change, social structures, and the life histories of individuals. However, such a research perspective was supplanted by other methodological-conceptual approaches to empirical social research for over fifty years. It was not until the 1960s that sociological interest in life course and biographical theoretical issues reawakened. Today, life course research is considered one of the most important conceptual innovations in sociology in recent decades. The content The life course as a social construction - What is "life course research"? - The life course as an institution - Collective life courses: generations, cohorts and social change - Structures of the life course - Life course research - a conceptual perspective - Life course research, quo vadis? The author Prof. Dr. Matthias Wingens teaches sociology at the University of Bremen, Bremen International Graduate School of Social Sciences (BIGSSS).
